

1. Choose up to three words that describe what you believe to be the public attitude to net zero in [place].

2. Rank the following categories according to the order of need for [place].

1 = least needed      5 = most needed

More energy efficient transport options

Local energy creation

More energy efficient buildings

Low energy use industries

Widespread attitudinal/behavioural changes

3. Which of the following green energy strategies would you be in favour of in [place]? (tick as many as necessary)

☐

Onshore wind turbines

☐

Offshore wind turbines

☐

Solar farms

☐

Subsidised home solar panels

☐

Incentives for low energy use

☐

Geothermal/biomass system

☐

Zero carbon new builds

☐

EV charging stations

☐

Micro hydroelectric system

4. [Place] is the right place to develop greener energy strategies.

☐

strongly agree

☐

agree

☐

neither

☐

disagree

☐

strongly disagree

☐

don't know

5. What do you feel is the biggest barrier to [place] achieving net zero and why?
