

Advanced Observation Bingo (Woodland)

Evidence of past plantation scheme	Area likely to have acidic soil	Evidence of timber felling	Invasive species
Management strategy (e.g. coppicing)	Endemic tree species	Disturbance-loving species	Tree adaption to low light conditions
Tree adaption to biotic conditions	Area of high carbon sequestration	Tree disease / poor health	Evidence of two trophic levels
Desire line footpath	Area of potential land use conflict	Dumping / Fly tipping	Area of likely high soil fertility
